 - On the return trip stop and see the opening of the Aratiatia Dam.
- 2.30pm Drop-off in Taupo

Geothermal Delights >> Jet Boating >> Personalised Commentary

TAUPO LOOKOUT

Lake Taupo is not always recognised as a volcano, yet its history has been fiery and violent. A total of 28 eruptions in the past 27,000 years have occurred, however the majority of these have only been small. The most recent Taupo eruption was 181AD, view the magical Lake Taupo and the three volcanic mountains of the central North Island and beyond.

HUKA FALLS

New Zealand's most visited natural attraction. Every second, Huka Falls is flushed with 250,000 cubic metres of water. The pressure shoots the water out over 8 metres and down into a beautifully coloured pool. The Maori word Huka means 'foam', and this is a most appropriate descriptor for the dramatic rapids that shape the largest falls on the Waikato River.

WAIRAKEI STEAM FIELD

The Wairakei power station is the second power station in the world to turn natural steam into energy. Wairakei was however the first power station to utilise wet steam energy. The Wairakei power station runs at 95% capacity, and supplies around 3.5% of New Zealand's power.

NEW ZEALAND RIVERJET

Jet boat down the Waikato River through the spectacular Tutukau gorge where the canyon walls rise dramatically up to 50 metres above the water and hear the tales behind past events. On the return journey experience the iconic ability of a Hamilton jet boat as our experienced driver/guide thrill you with 360 degree spins.

ORAKEI KORAKO

Cross the beautiful Waikato River between Rotorua and Taupo and discover Orakei Korako Cave and Thermal Park. Also known as the Hidden Valley, Orakei Korako is a unique visitor attraction – not to be missed. It's a geothermal wonderland, one of nature's true gifts.
